

New Product Introduction FD Wipe Touch Screen Cleaner.

FD Wipe

Developed by professional for safe cleaning of all touch screen technologies. FD Wipe is specially developed for NextWindow Optical Touch screen technology to bring no damage to the camera lens and retro reflection strips.

Special developed by a Dutch Laboratory for FD Global AG, result is a Professional Touch Screen Cleaner, non flammable, without Ammonia or abrasive materials.

FD Wipe takes off grease very easily and evaporates absolutely streak free.

Touch screen Integrators of large size monitors know all these problems concerning cleaning, often it takes more than 30 - 40 minutes to clean the glass properly. With FD Wipe this will be reduced to 10 minutes or even less.

FD Wipe comes in a nice transparent spray flacon which contains 500 ml, perfect for your customers, a successful example is education, children attend to stick their fingers in their mouth and nose, so cleaning the touch screen is most important here to reduce the chance of bacterial infections.

FD Wipe removes bacteria up to 99.9%.

For the professional user we have 1 litre spray flacons and cans to 25 litre for refilling your spray flacons.

FD Wipe can be used for Touch Screens, LCD Monitor / TV, Plasma monitor / TV, Glass, Mirrors and all shiny surfaces.
